Subject: West Fertilizer Preservation Order

David, attached is a preservation letter we sent to West Fertilizer right after the accident. The preservation order is intended to keep the accident site in its "as is" condition until a site preservation agreement is put in place. I have also sent this letter to the Adair/insurance company law firm. The CSB wants to document the current condition of the West site prior to any additional changes after ATF and the Fire Marshall's office relinquishes control.

We are reviewing the latest draft of the site control agreement and should be able to respond and move forward today.

Best Regards,

Donald S. Holmstrom

Matt and John,

Attached is a West Fertilizer CSB Preservation Letter that was sent to the company PO Box just after the incident. The CSB uses the preservation letter to ensure the preservation of the site and evidence until a site control agreement is put in place. It is the understanding of the CSB that West and various investigating agencies including the CSB intend to enter into such an agreement in the near future. The CSB is resending the preservation letter to communicate the need to preserve the site until the site control agreement is signed. Please send an acknowledgement of receipt of this communication or any questions you may have.

Don Holmstrom
